

**FOOD ENGINE** has been founded in Antwerp in 2016.

**FOOD ENGINE** is the **exclusive local distributor of METRO** provisions and cabin stores to ships. METRO is the world's third largest retailer.

**FOOD ENGINE's** mission is to contribute to the **crew wellbeing on board** by delivering high quality food and by consulting and coaching the crew on nutrition, physical and mental health issues.

**FOOD ENGINE** is active in the Belgian, Dutch and Northern French ports. Coaching sessions can be provided world wide.

**FOOD ENGINE:**  
*Food and health on board!*

**10**  
**REASONS**  
**TO CHOOSE**  
**FOOD ENGINE**  
**10**  
**WAYS**  
**HOW WE ARE**  
**DIFFERENT**  
**FROM**  
**THE OTHERS**

- 1 HIGH QUALITY FOOD:** our supplier Metro is a big international supplier to the horeca business. Your ship will get its provisions from the same stock as certain star hotels and star restaurants.
- 2 COMPETITIVE PRICING:** our trucks go straight from the Metro depots to your ship, with no intermediate storage. We thus shorten the supply chain, eliminate safety stock and reduce costs, which allows us to offer the highest quality products at low prices.
- 3 RELIABILITY** of a global operator: as a globally operating, publicly traded company listed on the Frankfurt stock exchange, Metro obviously complies fully with all regulations on food safety, hygiene and traceability.
- 4 BROAD RANGE** of products: choose from more than 8000 products in provisions, fresh, frozen and dry, as well as more than 2000 articles cabin stores, including table and galley utensils, cleaning products, household textile, stationary and gym equipment.
- 5 EFFICIENT AND AUTONOMOUS DELIVERY:** we organize autonomously the delivery to your ship. We follow up the ETA, take care of all customs formalities and coordinate with your agents and the terminal. We can deliver just-in-time, regardless of delays to the vessel.
- 6 SERVICE LEVEL AGREEMENTS:** we can enter into service level agreements with our clients, whereby the terms and conditions for our deliveries and services are mutually agreed, to the benefit of both parties.
- 7 FLEXIBILITY** in pricing and quantities. If you are a regular customer of the ports we serve or a marine caterer, we can analyze the most efficient delivery quantities, propose prices fixed for long periods and offer on board storage solutions.
- 8 CREW WELLBEING SERVICES:** as a ship owner, you are under pressure from sailors, regulators and tribunals to optimize the crew wellbeing on board. Our services can help you meet such demands. We offer coaching sessions to your crew on nutrition, physical and mental health topics they are daily confronted with. No theory, but practical tips and exercises in an easy to understand language, brought by a professional health coach.
- 9 FATIGUE MANAGEMENT:** crew fatigue impacts the vessel's safety. We can assist ship owners in designing fatigue management plans and train the officers to implement them. Particular emphasis is given to what every individual can do to minimize the fatigue risk.
- 10 TRANSPARENCY:** we have no problem in revealing the name of our supplier: our clients know we buy everything from the same supplier and how we can offer higher price/quality products.
